CONTENTS

Platform at a Glance

CareConnect AFH is an enterprise-grade management system for Adult Family Homes — covering resident care, clinical documentation, medications, compliance, billing, and operations. Most modules listed as "Soon" on early roadmaps are **already live** in the platform today.

• LIVE — CORE CLINICAL MODULES

• BUILT — AVAILABLE IN PLATFORM

Resident Care (10 modules)

Administration (5 modules)

Billing (3 modules)

Platform (7 modules)

STATUS SUMMARY

Roadmap label	Modules
Live	Residents, Care Plans, NCP, Progress Notes, Incidents, Behavioral Tracking
Built (available now)	Vitals, Medications, eMAR, PRN, Staff, Tasks, Appointments, Forms, Roles & Administration, Billing, Claims & Billing, Invoices, Dashboard, E-Signature, Audit Trail, Facility, Organization, Compliance, Birthdays

Clinical & Resident Modules

Residents

LIVE

MAIN FEATURES

- ✓ Full resident profiles with 150+ fields, search, and multi-organization support
- ✓ New Resident Admission workflow with dynamic questionnaires
- ✓ Document folders — upload, download, password-protected folders, expiration dates
- ✓ AI PDF extraction — auto-populate resident data from assessment PDFs
- ✓ Document compliance badges and recommended actions per resident
- ✓ Billing tier assignment and roster PDF export

CASE STUDY

NEW ADMISSION IN HOURS, NOT DAYS

Sunrise AFH receives a DSHS assessment PDF for a new resident. Staff uploads it; AI extracts demographics, diagnoses, and care needs. They complete the admission questionnaire, upload required documents into compliance folders, and send admission forms for e-signature — all before move-in. The Compliance Hub shows only the physician summary is still missing.

Care Plans

LIVE

MAIN FEATURES

- ✓ Nursing care plans: Problems → Goals → Interventions hierarchy
- ✓ Care Library — reusable problems, goals, and interventions
- ✓ Version history with compare and rollback (admin)
- ✓ AI — detect problems from notes, generate drafts, suggest updates
- ✓ Goal progress, intervention compliance, and review-due alerts
- ✓ Dashboard, statistics, and PDF export

CASE STUDY

PLAN STAYS CURRENT AFTER A FALL

After a resident falls, a progress note documents increased fall risk. AI suggests adding a mobility problem and interventions. The nurse updates the care plan, approves it, and sets

the next 30-day review. At survey time, versioned history shows exactly what changed and when.

NCP (Negotiated Care Plan)

LIVE

MAIN FEATURES

- ✓ Upload DSHS/CBHS assessment PDFs (single or bulk)
- ✓ AI extraction of 400+ structured fields into editable form
- ✓ Section-by-section review, save, and DSHS draft generation
- ✓ DOCX population — generate official NCP document from extracted data
- ✓ Approval workflow and AI-generated assessment summary

CASE STUDY

FROM 40-PAGE PDF TO SIGNED NCP

Green Valley AFH uploads a 40-page assessment. The system extracts fields into the NCP form; the manager corrects medication entries, generates the DOCX, and routes it for signature. A full day of manual copy-paste becomes one afternoon of review.

Notes, Incidents & Behavioral

Progress Notes

LIVE

MAIN FEATURES

- ✓ Create and edit notes by type (care, behavior, incident, status update)
- ✓ Full version history on every edit
- ✓ AI note generation from brief caregiver input
- ✓ Filter by resident, type, and date range
- ✓ PDF export for records and surveys

CASE STUDY

END-OF-SHIFT HANDOFF

A caregiver writes bullet points; AI expands them into a proper progress note. The oncoming shift filters notes to their assigned residents. During an investigation, admin exports 30 days of notes to PDF in one click.

Incidents

LIVE

MAIN FEATURES

- ✓ DSHS-aligned incident report forms with body map for injuries
- ✓ Witnesses, notifications, internal notes, and status workflow
- ✓ AI draft from free-text description
- ✓ Automatic and manual compliance checks against regulatory requirements
- ✓ Activity log and print/PDF export

CASE STUDY

FALL WITH SURVEY-READY DOCUMENTATION

A resident falls at 2:15 PM. Staff logs the incident with body map and witnesses. AI drafts the narrative; the admin runs a compliance check, confirms all required fields, and files the report before the notification window closes.

MAIN FEATURES

- ✓ Behavioral logs — type, severity, triggers, interventions, outcome
- ✓ Batch logging; AI summaries, intervention suggestions, and outcomes
- ✓ Separate AI behavioral notes with versioning
- ✓ Dashboard and trend charts (frequency, severity, triggers)
- ✓ Per-log and bulk report PDF export

CASE STUDY

ESCALATING AGITATION PATTERN

Over two weeks, logs show agitation spikes before dinner. Trends reveal "loud environment" as a trigger. Staff adjust the routine; severity drops. The behavioral report export supports a psychiatrist visit with objective data.

Medications & eMAR

Vitals

BUILT

MAIN FEATURES

- ✓ Record BP, pulse, temperature, O2 saturation, weight, and more
- ✓ History and trends over time
- ✓ Integrated with eMAR (vitals before certain medications)

CASE STUDY

PRN BLOOD PRESSURE PROTOCOL

A resident has an as-needed BP medication. Staff record vitals daily; trends show three days of elevated readings. The nurse contacts the physician and documents the decision in a progress note — vitals and MAR tell one consistent story.

Medications

BUILT

MAIN FEATURES

- ✓ Medication list per resident — dose, route, schedule, instructions
- ✓ Prescription PDF upload; activate and deactivate medications
- ✓ Medication list and detail PDF export

eMAR (Electronic Medication Administration Record)

BUILT

MAIN FEATURES

- ✓ MAR grid (calendar view) and dose recording
- ✓ Statuses: given, held, refused, and more
- ✓ Lock/unlock records; eMAR compliance dashboard
- ✓ MAR PDF export (standard and calendar format)
- ✓ Full audit trail for MAR changes

CASE STUDY

"WHO GAVE THE 8 AM DOSE ON MARCH 3?"

The admin opens MAR records, filters by resident and date, and shows locked entries with caregiver name and timestamp. The audit trail PDF confirms no unauthorized edits after lock — exactly what a surveyor needs.

PRN Records

BUILT

MAIN FEATURES

- ✓ Record PRN doses with reason and time
- ✓ Follow-up response required 30–60 minutes after dose
- ✓ Pending follow-up queue and physician notification tracking
- ✓ PRN log PDF export

CASE STUDY

PAIN PRN WITH REQUIRED FOLLOW-UP

Staff gives pain PRN at 3 PM and records why. The system flags follow-up due at 4 PM; the caregiver documents "pain reduced from 8 to 3." The full PRN log is ready for pharmacy review.

Staff, Tasks & Operations

Staff

BUILT

MAIN FEATURES

- ✓ Staff profiles linked to user accounts, photos, facility assignment
- ✓ Document folders for credentials, training, and background checks
- ✓ Expiration tracking on documents with compliance alerts
- ✓ Staff compliance dashboard and recommended actions
- ✓ Document audit history; self-service view for staff

CASE STUDY

CREDENTIAL EXPIRING BEFORE SURVEY

The Compliance Hub shows a CNA's CPR certificate expiring in 12 days. Admin clicks **Resolve** →, uploads the renewed card, and the staff row turns green before the state visit.

Tasks

BUILT

MAIN FEATURES

- ✓ Create and assign tasks with priority, due date, and status
- ✓ Facility vs personal views; overdue detection
- ✓ Task statistics on the home dashboard

CASE STUDY

FIRE DRILL FOLLOW-UP

After an evacuation drill, the manager creates tasks: "Fix exit sign in hall B" and "Update emergency contact list." Tasks appear on the dashboard until closed.

Appointments

BUILT

MAIN FEATURES

- ✓ Schedule appointments per resident (doctor, dental, therapy)
- ✓ Calendar view, notifications, and export

CASE STUDY

CARDIOLOGY FOLLOW-UP

A cardiologist appointment is scheduled; caregivers receive a notification. After the visit, a progress note documents outcomes and the appointment is marked complete.

Forms

BUILT

MAIN FEATURES

- ✓ AI form builder from uploaded documents
- ✓ Dynamic form schemas, submissions, and draft save/resume
- ✓ Review form workflow (human-in-the-loop compliance)
- ✓ Role-based visibility — guardians see own submissions; admin sees all

CASE STUDY

CUSTOM INTAKE FORM WITHOUT A DEVELOPER

An admin uploads a paper intake form; AI generates a digital schema. Families submit online; staff review submissions before merging data into the resident record.

Roles & Administration

BUILT

MAIN FEATURES

- ✓ Custom roles from templates (Nurse, Caregiver, Billing, Read-only)
- ✓ Granular module:action permissions (RBAC)
- ✓ Invite member, user activate/deactivate, role assignment
- ✓ Organization settings and member management

CASE STUDY

LEAST-PRIVILEGE FOR A NEW CAREGIVER

A new hire gets the Caregiver role: view residents, write notes, record MAR — but cannot delete incidents or manage billing. Admin retains full access.

Revenue & Claims

Billing (Tiers)

BUILT

MAIN FEATURES

- ✓ Billing tiers with rates and features (CRUD)
- ✓ Assign tier per resident with start and end dates
- ✓ AI-assisted tier feature suggestions

Claims & Billing

BUILT

MAIN FEATURES

- ✓ Medicaid/DSHS-style claims records with prefill from resident + tier
- ✓ Provider settings management
- ✓ Per-resident billing history
- ✓ Excel export and regenerate billing sheets

CASE STUDY

MONTH-END DSHS BILLING

The billing clerk opens Claims & Billing, prefills March records from resident tiers, reviews one changed tier, and downloads Excel files for each resident — instead of rebuilding spreadsheets manually.

Invoices

BUILT

MAIN FEATURES

- ✓ Generate invoices (single resident or monthly batch)
- ✓ Invoice status tracking for private-pay families

CASE STUDY

FAMILY PRIVATE-PAY INVOICE

A family on private pay receives a monthly invoice from the resident's tier. Admin marks it sent and paid without touching claims records.

Core Platform Modules

Dashboard

BUILT

MAIN FEATURES

- ✓ Home KPIs — residents, tasks, incidents, behavioral activity, visitors
- ✓ 6-month trend charts; org/facility/resident scoping
- ✓ Permission-aware quick actions and upcoming birthdays widget

E-Signature

BUILT

MAIN FEATURES

- ✓ DocuSign integration — send envelopes with PDFs
- ✓ Track status, sync from DocuSign, void envelopes
- ✓ Webhook updates for admission and consent workflows

CASE STUDY

ADMISSION PACKET SIGNED FROM HOME

Family receives DocuSign links for admission agreements; status shows "Completed" in the platform before move-in day.

Audit Trail

BUILT

MAIN FEATURES

- ✓ System-wide audit log with 100+ action types
- ✓ PHI access logging (HIPAA); filter, detail view, security events
- ✓ PDF export — Admin and Super Admin only

CASE STUDY

"WHO VIEWED THIS RESIDENT'S MEDICATIONS?"

After a privacy concern, admin filters audit logs for PHI access on a resident and exports a PDF for compliance review.

Facility

BUILT

MAIN FEATURES

- ✓ Multi-facility management per organization
- ✓ Facility documents with compliance folders and expiration tracking
- ✓ Evacuation drills (DSHS 21-065 / WAC-aligned)
- ✓ Visitor log with QR sign-in, check-in/out, and export
- ✓ Cross-tenant facility switching for multi-org operators

CASE STUDY

SURVEYOR ASKS FOR LAST FIRE DRILL

Admin opens Evacuation Drills, shows the last two drills with completed forms, and pulls visitor logs for the same week — all from one module set.

Organization, Compliance & Birthdays

Organization

BUILT

MAIN FEATURES

- ✓ Multi-tenant organization management (Super Admin)
- ✓ Org profile, settings, member list, and stats
- ✓ Tenant switching for users with multiple org access

CASE STUDY

OPERATOR WITH 3 AFH LICENSES

One login switches between three organizations; each tenant's residents, staff, and compliance data stay fully isolated.

Compliance (Document Compliance Hub)

BUILT

MAIN FEATURES

- ✓ Central Compliance Hub for residents, staff, and facilities
- ✓ Required document catalog; missing, partial, and complete status
- ✓ Expired and expiring documents with Resolve → deep links
- ✓ Critical missing items, recommended actions, notifications
- ✓ Weekly email digest, CSV export, and compliance audit trail

CASE STUDY

PRE-SURVEY DOCUMENT SWEEP

Two weeks before survey, the hub shows 4 expired staff CPR cards and 2 residents missing physician summaries. Admin resolves each via deep links; the CSV export becomes the survey prep checklist.

Birthdays

BUILT

MAIN FEATURES

- ✓ Upcoming birthdays for residents, staff, and invited users
- ✓ Dashboard widget and in-app notifications
- ✓ Dedicated birthdays page

CASE STUDY

RESIDENT BIRTHDAY RECOGNITION

The dashboard shows a birthday tomorrow; staff plans a small celebration and documents it in a progress note — improving morale and family communication.
